Subject Index of Volume 42

Acetylene
  activation of Ta(V) chloride as homogeneous catalyst for cyclotrimerization of, 105
  phenyl-; role of Nb(V) chloride in catalytic cyclotrimerization of, 151
Activation
  of C–halogen bond in polyhalomethanes by Cu(I) complexes, 51
  of Ta(V) chloride as homogeneous catalyst for cyclotrimerization of acetylene, 105
Acylation
  over cation-exchanged montmorillonite, 229
Addition
  Michael, of β-dicarbonyls to α,β-unsaturated ketones catalyzed by mixed sphere β-carbonylenolate diphosphino metal complexes, 115
Adsorption
  CO, of TiO-containing Ni surfaces; molecular orbital study by DV-X_α methods, 337
Alcohol
  alcoholic Pd(II) salts; liquid phase oxidation of cyclohexene with, 237
  catechol derivatives; asymmetrically-selective oxidation of, by iron(III) complex ions anchored to polypeptides, 269
  3,5-di-t-butylcatechol; heteropolyvanadates as catalysts for oxygenation of, 57
  ethanol; selective electrogenerative oxidation of, to ethyl acetate; electrocatalytic activity of sulphur-modified Pt electrodes, 331
  ethylene glycol; role of 1-methyl-3-ethylbenzimidazolium bromide–Ru catalyst in one-step production of, via formaldehyde condensation and in direct synthesis from synthesis gas, 389
  propan-2-ol; asymmetric hydrogen transfer reactions from, to ketones catalyzed by Ir(I) derivatives with chiral Schiff bases, 81
  2-propanol dehydrogenation; photocatalysis of *trans*-[RhCl(CO)-$(PPh_3)_2$] under MLCT irradiation for, 183
Alkenes
  application of metathesis reaction to synthesis of α,ω-bifunctional prepolymers; optimizing conditions for obtaining dienic and trienic compounds by cometathesis of cyclopentene with 4-octene and dimethyl 3-hexenediolate, 289
  $(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$, $Ru_3(CO)_{12}$ and $(\eta^5\text{-}C_5H_5)_2Ni_2(CO)_2$ as heterogeneous catalyst precursors; hydrogenation, dehydrogenation and isomerization of linear and cyclic monoenes and dienes, and of aromatic hydrocarbons, 307
  cyclohexene:
    homogeneous hydrogenation of, catalyzed by Ru(II) and (III) and their trichlorostannato complexes; proton NMR and rate studies, 161
    liquid phase oxidation of, with alcoholic Pd(II) salts, 237
  cyclooctene; kinetics and mechanism of Ru(III)–EDTA catalyzed oxidation of *cis*-cyclooctene by molecular oxygen, 323
  cyclopentene; Pd(II)-catalyzed oxidation of, in presence of Cu(II) chloride and molecular oxygen, 247
  dioxymethylene species; characterization of, over Cu–Zn catalysts, 205
  propylene; selectivity studies on hydroformylation of, catalysed by cluster anion $[HRu_3(CO)_{11}]^-$, 361
  and vinylsilanes; aminoorganosiloxane–silicate-supported Rh complexes as catalysts for hydrosilylation of, 195
Alumina
  γ-; immobilization of endopolygalacturonase on, 137
Amines
  mixed alkyl; selective catalytic syntheses of, 367

© Elsevier Sequoia/Printed in The Netherlands

Amino bases
interaction of, with tartrate-modified Ni catalysts, 187
Aminoorganosiloxane
–silicate-supported Rh complexes as catalysts for hydrosilylation of alkenes and vinylsilanes, 195
Aromatic compounds
anchoring of hydridocarbonyltris-(triphenylphosphine)rhodium(I) to crosslinked phosphinated polystyrenes; IR study, 301
benzene; catalytic hydroxylation of, by Cu–ascorbic acid $-O_2$ system, 99
$(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$, $Ru_3(CO)_{12}$ and $(\eta^5\text{-}C_5H_5)_2Ni_2(CO)_2$ as heterogeneous catalyst precursors; hydrogenation, dehydrogenation and isomerization of linear and cyclic monoenes and dienes, and of aromatic hydrocarbons, 307
diphenylphosphinites from D-glucose and D-xylose; chiral bidentate ligands from most widespread monosaccharides for enantioselective hydrogenation, 173
nitrobenzene hydrogenation on Pt–Sn catalysts, 379
o-substituted anilines; Co(II) ion catalyzed oxidation of, with molecular oxygen, 357
phenylacetylene; role of Nb(V) chloride in catalytic cyclotrimerization of, 151
photocatalysis of *trans*-$[RhCl(CO)(PPh_3)_2]$ under MLCT irradiation for 2-propanol dehydrogenation, 183
reductive carbonylation of nitroaromatic compounds to urethanes catalyzed by $[Pd(1,10\text{-phenanthroline})_2][PF_6]_2$ and related complexes, 67
role of 1-methyl-3-ethylbenzimidazolium bromide–Ru catalyst in one-step production of ethylene glycol via formaldehyde condensation and in direct synthesis from synthesis gas, 389
synthesis of anisole by Lewis acid catalysed decarboxylation of methyl phenyl carbonate, 353
Ascorbic acid
catalytic hydroxylation of benzene by Cu–ascorbic acid $-O_2$ system, 99
Bismuth
preparation and characterization of U–Bi mixed oxide catalysts, 15
Carbon bond
activation of C–halogen bond in polyhalomethanes by Cu(I) complexes, 51
Carbon monoxide
adsorption of TiO-containing Ni surfaces; molecular orbital study by DV-X_α methods, 337
hydrogenation of, by Ru catalysts; synergistic effect of chloride salts and weak acids, 215
Carbonyl
IR study of anchoring of hydridocarbonyltris(triphenylphosphine)-rhodium(I) to crosslinked phosphinated polystyrenes, 301
Michael addition of β-dicarbonyls to α,β-unsaturated ketones catalyzed by mixed sphere β-carbonylenolate diphosphino metal complexes, 115
Carbonylation
reductive, of nitroaromatic compounds to urethanes catalysed by $[Pd(1,10\text{-phenanthroline})_2][PF_6]_2$ and related complexes, 67
Cellulose acetate beads
hydrolysis of sugars by microbial cells entrapped in, 1
Chloride salts
and weak acids; synergistic effect of; hydrogenation of CO by Ru catalysts, 215
Cluster(s)
anion $[HRu_3(CO)_{11}]^-$; selectivity studies on hydroformylation of propylene catalysed by, 361
rhodium phosphite, as hydrosilylation catalysts, 91
Cobalt
Co(II) ion catalysed oxidation of *o*-substituted anilines with molecular oxygen, 357
Copper
catalytic hydroxylation of benzene by Cu–ascorbic acid $-O_2$ system, 99
characterization of dioxymethylene species over Cu–Zn catalysts, 205
Cu(II) chloride and molecular oxygen; Pd(II)-catalyzed oxidation of cyclopentene in presence of, 247

Cu(I) complexes; activation of C–halogen bond in polyhalomethanes by, 51
Cyclotrimerization
of acetylene; activation of Ta(V) chloride as homogeneous catalyst for, 105
catalytic; role of Nb(V) chloride in, of phenylacetylene, 151

Decarboxylation
Lewis acid catalysed; synthesis of anisole by, of methyl phenyl carbonate, 353
Dehydrogenation
and hydrogenation and isomerization of linear and cyclic monoenes and dienes, and of aromatic hydrocarbons; $(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$, $Ru_3(CO)_{12}$ and $(\eta^5\text{-}C_5H_5)_2Ni_2(CO)_2$ as heterogeneous catalyst precursors, 307
2-propanol; photocatalysis of *trans*-$[RhCl(CO)(PPh_3)_2]$ under MLCT irradiation for, 183
Dioxymethylene species
characterization of, over Cu–Zn catalysts, 205

Electrocatalytic activity
of sulphur-modified Pt electrodes; selective electrogenerative oxidation of ethanol to ethyl acetate, 331
Electrodes
chemically modified; catalysis of dioxygen reduction at electrochemically polymerized iron protoporphyrin film electrode, 37
electrocatalytic activity of sulphur-modified Pt electrodes; selective electrogenerative oxidation of ethanol to ethyl acetate, 331
Endopolygalacturonase
immobilization of, on γ-alumina, 137
Enzyme catalysis
role of molecular factors in, 127
Esters
cellulose acetate beads; hydrolysis of sugars by microbial cells entrapped in, 1
ethyl acetate; selective electrogenerative oxidation of ethanol to; electrocatalytic activity of sulphur-modified Pt electrodes, 331
methylacetoacetate; particle size effect on enantioselective hydrogenation of, over silica-supported Ni catalyst, 29
urethanes; reductive carbonylation of nitroaromatic compounds to, catalysed by $[Pd(1,10\text{-phenanthroline})_2][PF_6]_2$ and related complexes, 67

Film
chemically modified electrodes; catalysis of dioxygen reduction at electrochemically polymerized iron protoporphyrin film electrode, 37
Formaldehyde condensation
role of 1-methyl-3-ethylbenzimidazolium bromide–Ru catalyst in one-step production of ethylene glycol via, and in direct synthesis from synthesis gas, 389

Halogen
activation of C–halogen bond in polyhalomethanes by Cu(I) complexes, 51
Heteropolyvanadates
as catalysts for oxygenation of 3,5-di-t-butylcatechol, 57
Hydroformylation
selectivity studies on, of propylene catalysed by cluster anion $[HRu_3(CO)_{11}]^-$, 361
Hydrogen
asymmetric, transfer reactions from propan-2-ol to ketones catalysed by Ir(I) derivatives with chiral Schiff bases, 81
regeneration of NADPH and ketone hydrogenation by, in enzymatic system, 285
Hydrogenation
of CO by Ru catalysts; synergistic effect of chloride salts and weak acids, 215
and dehydrogenation and isomerization of linear and cyclic monoenes and dienes, and of aromatic hydrocarbons; $(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$, $Ru_3(CO)_{12}$ and $(\eta^5\text{-}C_5H_5)_2Ni_2(CO)_2$ as heterogeneous catalyst precursors, 307
enantioselective:
chiral bidentate ligands from most widespread monosaccharides for;

diphenylphosphinites from D-glucose and D-xylose, 173
particle size effect on, of methylacetoacetate over silica-supported Ni catalyst, 29
homogeneous, of cyclohexene catalysed by Ru(II) and (III) and their trichlorostannato complexes; proton NMR and rate studies, 161
nitrobenzene, on Pt–Sn catalysts, 379
regeneration of NADPH and ketone hydrogenation by hydrogen in enzymatic system, 285
Hydrolysis
of sugars by microbial cells entrapped in cellulose acetate beads, 1
Hydrosilylation
aminoorganosiloxane–silicate-supported Rh complexes as catalysts for, of alkenes and vinylsilanes, 195
catalysts; rhodium phosphite clusters as, 91
Hydroxylation
catalytic, of benzene by Cu–ascorbic acid $-O_2$ system, 99

Immobilization
of endopolygalacturonase on γ-alumina, 137
treatment of penicillin-containing milk by penicillinase immobilized by a new technique, 7
Iridium
Ir(I) derivatives with chiral Schiff bases; asymmetric hydrogen transfer reactions from propan-2-ol to ketones catalysed by, 81
Iron
asymmetrically-selective oxidation of catechol derivatives by iron(III) complex ions anchored to polypeptides, 269
chemically modified electrodes; catalysis of dioxygen reduction at electrochemically polymerized iron protoporphyrin film electrode, 37
Irradiation
MLCT; photocatalysis of *trans*-[RhCl(CO)$(PPh_3)_2$] under, for 2-propanol dehydrogenation, 183
Isomerization
and hydrogenation and dehydrogenation of linear and cyclic monoenes and dienes, and of aromatic hydrocarbons; $(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$, $Ru_3(CO)_{12}$ and $(\eta^5\text{-}C_5H_5)_2Ni_2(CO)_2$ as heterogeneous catalyst precursors, 307

Ketone(s)
asymmetric hydrogen transfer reactions from propan-2-ol to, catalysed by Ir(I) derivatives with chiral Schiff bases, 81
regeneration of NADPH and ketone hydrogenation by hydrogen in enzymatic system, 285
α,β-unsaturated; Michael addition of β-dicarbonyls to, catalysed by mixed sphere β-carbonylenolate diphosphino metal complexes, 115

Lewis acid
catalysed decarboxylation; synthesis of anisole by, of methyl phenyl carbonate, 353

Metathesis reaction
application of, to synthesis of α,ω-bifunctional prepolymers; optimizing conditions for obtaining dienic and trienic compounds by cometathesis of cyclopentene with 4-octene and dimethyl 3-hexene dioate, 289
transformation of oxo Re complexes used as catalysts in, 347
Microbial cells
hydrolysis of sugars by, entrapped in cellulose acetate beads, 1
Milk
pencillin-containing; treatment of, by pencillinase immobilized by a new technique, 7
Mixed oxide catalysts
U–Bi; preparation and characterization of, 15
Molecular factors
role of, in enzyme catalysis, 127
Molecular orbital study
by DV-X_α methods; CO adsorption of TiO-containing Ni surfaces, 337
Montmorillonite
cation-exchanged; acylation over, 229

NADPH regeneration
and ketone hydrogenation by hydrogen in enzymatic system, 285
Nickel
$(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$, Ru_3-

$(CO)_{12}$ and $(\eta^5\text{-}C_5H_5)_2Ni_2(CO)_2$ as heterogeneous catalyst precursors; hydrogenation, dehydrogenation and isomerization of linear and cyclic monoenes and dienes, and of aromatic hydrocarbons, 307
CO adsorption of TiO-containing Ni surfaces; molecular orbital study by DV-X_α methods, 337
particle size effect on enantioselective hydrogenation of methylacetoacetate over silica-supported Ni catalyst, 29
tartrate-modified catalysts; interaction of amino bases with, 187
Niobium
role of Nb(V) chloride in catalytic cyclotrimerization of phenylacetylene, 151

Oxidation
asymmetrically-selective, of catechol derivatives by iron(III) complex ions anchored to polypeptides, 269
Co(II) ion catalysed, of *o*-substituted anilines with molecular oxygen, 357
liquid phase, of cyclohexene with alcoholic Pd(II) salts, 237
Pd(II)-catalysed, of cyclopentene in presence of Cu(II) chloride and molecular oxygen, 247
Ru(III)–EDTA catalysed, of *cis*-cyclooctene by molecular oxygen; kinetics and mechanism, 323
selective electrogenerative, of ethanol to ethyl acetate; electrocatalytic activity of sulphur-modified Pt electrodes, 331
Oxygen
catalytic hydroxylation of benzene by Cu–ascorbic acid $-O_2$ system, 99
dioxygen reduction; catalysis of, at electrochemically polymerized iron protoporphyrin film electrode; chemically modified electrodes, 37
molecular oxygen:
Co(II) ion catalysed oxidation of *o*-substituted anilines with, 357
and Cu(II) chloride; Pd(II)-catalysed oxidation of cyclopentene in presence of, 247
kinetics and mechanism of Ru(III)–EDTA catalysed oxidation of *cis*-cyclooctene by, 323
Oxygenation
heteropolyvanadates as catalysts for, of 3,5-di-t-butylcatechol, 57

Palladium
alcoholic Pd(II) salts; liquid phase oxidation of cyclohexene with, 237
Pd(II)-catalysed oxidation of cyclopentene in presence of Cu(II) chloride and molecular oxygen, 247
reductive carbonylation of nitroaromatic compounds to urethanes catalysed by [Pd(1,10-phenanthroline)$_2$][PF_6]$_2$ and related complexes, 67
Particle size effect
on enantioselective hydrogenation of methylacetoacetate over silica-supported Ni catalyst, 29
Penicillin
treatment of penicillin-containing milk by penicillinase immobilized by a new technique, 7
Phosphorus
anchoring of hydridocarbonyltris-(triphenylphosphine)rhodium(I) to crosslinked phosphinated polystyrenes; IR study, 301
diphenylphosphinites from D-glucose and D-xylose; chiral bidentate ligands from most widespread monosaccharides for enantioselective hydrogenation, 173
Michael addition of β-dicarbonyls to α,β-unsaturated ketones catalysed by mixed sphere β-carbonylenolate diphosphino metal complexes, 115
photocatalysis of *trans*-[RhCl(CO)-(PPh_3)$_2$] under MLCT irradiation for 2-propanol dehydrogenation, 183
rhodium phosphite clusters as hydrosilylation catalysts, 91
Photocatalysis
of *trans*-[RhCl(CO)(PPh_3)$_2$] under MLCT irradiation for 2-propanol dehydrogenation, 183
Platinum
electrocatalytic activity of sulphur-modified Pt electrodes; selective electrogenerative oxidation of ethanol to ethyl acetate, 331
nitrobenzene hydrogenation on Pt–Sn catalysts, 379

Polyhalomethanes
activation of C–halogen bond in, by Cu(I) complexes, 51
Polypeptides
asymmetrically-selective oxidation of catechol derivatives by iron(III) complex ions anchored to, 269
Prepolymers
α,ω-bifunctional; application of metathesis reaction to synthesis of; optimizing conditions for obtaining dienic and trienic compounds by cometathesis of cyclopentene with 4-octene and dimethyl 3-hexene dioate, 289

Reduction
dioxygen; catalysis of, at electrochemically polymerized iron protoporphyrin film electrode; chemically modified electrodes, 37
Resin
sulphonic acid ion exchange; molecular mechanisms of MTBE synthesis on, 257
Rhenium
transformation of oxo Re complexes used as catalysts in metathesis reaction, 347
Rhodium
aminoorganosiloxane–silicate-supported Rh complexes as catalysts for hydrosilylation of alkenes and vinylsilanes, 195
anchoring of hydridocarbonyltris-(triphenylphosphine)rhodium(I) to crosslinked phosphinated polystyrenes; IR study, 301
photocatalysis of *trans*-[RhCl(CO)-$(PPh_3)_2$] under MLCT irradiation for 2-propanol dehydrogenation, 183
rhodium phosphite clusters as hydrosilylation catalysts, 91
Ruthenium
$(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$, $Ru_3(CO)_{12}$ and $(\eta^5\text{-}C_5H_5)_2Ni_2(CO)_2$ as heterogeneous catalyst precursors; hydrogenation, dehydrogenation and isomerization of linear and cyclic monoenes and dienes, and of aromatic hydrocarbons, 307
homogeneous hydrogenation of cyclohexene catalysed by Ru(II) and (III) and their trichlorostannato complexes; proton NMR and rate studies, 161
hydrogenation of CO by Ru catalysts; synergistic effect of chloride salts and weak acids, 215
role of 1-methyl-3-ethylbenzimidazolium bromide–Ru catalyst in one-step production of ethylene glycol via formaldehyde condensation and in direct synthesis from synthesis gas, 389
Ru(III)–EDTA catalysed oxidation of *cis*-cyclooctene by molecular oxygen; kinetics and mechanism, 323

Saccharides
most widespread mono-; chiral bidentate ligands from, for enantioselective hydrogenation; diphenylphosphinites from D-glucose and D-xylose, 173
Schiff bases
chiral; asymmetric hydrogen transfer reactions from propan-2-ol to ketones catalyzed by Ir(I) derivatives with, 81
Silicon
aminoorganosiloxane–silicate-supported Rh complexes as catalysts for hydrosilylation of alkenes and vinylsilanes, 195
silica-supported Ni catalyst; particle size effect on enantioselective hydrogenation of methylacetoacetate over, 29
Spectroscopy
IR study of anchoring of hydridocarbonyltris(triphenylphosphine)-rhodium(I) to crosslinked phosphinated polystyrenes, 301
proton NMR and rate studies; homogeneous hydrogenation of cyclohexene catalysed by Ru(II) and (III) and their trichlorostannato complexes, 161
Sugars
diphenylphosphinites from D-glucose and D-xylose; chiral bidentate ligands from most widespread monosaccharides for enantioselective hydrogenation, 173
hydrolysis of, by microbial cells entrapped in cellulose acetate beads, 1

Sulphonic acid
ion exchange resin; molecular mechanisms of MTBE synthesis on, 257
Sulphur
electrocatalytic activity of sulphur-modified Pt electrodes; selective electrogenerative oxidation of ethanol to ethyl acetate, 331
Surfaces
CO adsorption of TiO-containing Ni surfaces; molecular orbital study by DV-X_α methods, 337
Syntheses
selective catalytic, of mixed alkyl amines, 367
Synthesis
of anisole by Lewis acid catalysed decarboxylation of methyl phenyl carbonate, 353
of α,ω-bifunctional prepolymers; application of metathesis reaction to; optimizing conditions for obtaining dienic and trienic compounds by cometathesis of cyclopentene with 4-octene and dimethyl 3-hexenedioate, 289
MTBE; molecular mechanisms of, on sulphonic acid ion exchange resin, 257
role of 1-methyl-3-ethylbenzimidazolium bromide–Ru catalyst in one-step production of ethylene glycol via formaldehyde condensation and in direct synthesis from synthesis gas, 389
Synthesis gas
role of 1-methyl-3-ethylbenzimidazolium bromide–Ru catalyst in one-step production of ethylene glycol via formaldehyde condensation and in direct synthesis from, 389

Tantalum
activation of Ta(V) chloride as homogeneous catalyst for cyclotrimerization of acetylene, 105
Tartrate
interaction of amino bases with tartrate-modified Ni catalysts, 187
Tin
homogeneous hydrogenation of cyclohexene catalysed by Ru(II) and (III) and their trichlorostannato complexes; proton NMR and rate studies, 161
nitrobenzene hydrogenation on Pt–Sn catalysts, 379
Titanium
CO adsorption of TiO-containing Ni surfaces; molecular orbital study by DV-X_α methods, 337

Uranium
preparation and characterization of U–Bi mixed oxide catalysts, 15

Vanadium
heteropolyvanadates as catalysts for oxygenation of 3,5-di-t-butylcatechol, 57
Vinylsilanes
and alkenes; aminoorganosiloxane–silicate-supported Rh complexes as catalysts for hydrosilylation of, 195

Weak acids
and chloride salts; synergistic effect of; hydrogenation of CO by Ru catalysts, 215

Zinc
characterization of dioxymethylene species over Cu–Zn catalysts, 205
